Education

University of Waterloo — Sep. 2021 – Apr. 2026
Bachelor of Applied Science – Computer Engineering, Co-op (Honours) — *Waterloo, ON*

Technical Skills

Languages: TypeScript, JavaScript, Python, Ruby, Java, C, C++, GraphQL, SQL, HTML, CSS, Verilog, Kotlin, MATLAB, PHP
Frameworks/Libraries: React, Redux, Rails, Next, React Native, Expo, Node, Vue, Spring Boot, Playwright, Cypress, Express
Tools: Git, Jira, Datadog, Vercel, Figma, Sentry, Grafana, Docker, Jenkins, CircleCI, Buildkite, Sonarqube, Vivado, Firebase

Experience

StackAdapt — Sep. 2025 – Dec. 2025
Software Engineer Intern — *Toronto, ON*

- Built **multiple frequency caps** feature for **5 ad types** with **GQL/Redux** to enable granular **user-level campaign pacing**
- Restored **100% Buildkite validation** by standardizing **Playwright locator** component patterns, stabilizing **30+ e2e tests**
- Updated **geo-targeting data** using a **30,000-record rake ingest** and **RSpec scripts** to republish live ad campaigns
- Strengthened backend **data integrity** by improving **native ad validation** logic for **11,000,000+ production records**
- Improved **GQL error callbacks** and nested-path handling across **80+ references** to boost **Sentry error observability**
- Directed a **StackHack** team of 5 to deliver a **global advertiser filter**, unifying cross-platform logic across **4 repositories**

theScore — Jan. 2025 – Apr. 2025
Software Engineer Intern — *Toronto, ON*

- Upgraded **theScore.com** web platform from **React 16/Next 9** to **React 19/Next 15**, improving **Lighthouse scores** by **>40%**
- Restructured component library for **5 marketing applications** by eliminating barrel files, **reducing bundle size** by **33%**
- Built new **ESPN Bet signup form** with **React/GQL**, deployed for NFL Championship weekend with **25,000+ impressions**
- Improved **configs/scripts** for **CircleCI automation** in 5 web applications, boosting **Lighthouse scores** from **67 to 100**

PointClickCare — Jan. 2024 – Apr. 2024
Software Engineer Intern — *Mississauga, ON*

- Updated **6 Spring Boot microservices** to support Post-Acute Care products with **>60% skilled nursing market** share
- Adapted **backend request** using **Redox API** to boost **National Provider Identifier** transmission success from **28% to 100%**
- Wrote **automated unit/integration test** suites using **Cypress** to maintain a **Sonarqube code coverage** score **>90%**

Amdocs — May 2023 – Aug. 2023
Software Engineer Intern — *Toronto, ON*

- Developed **10+ React components** using **Material UI** to fulfil mockups for **telecommunications enterprise** software
- Directed **full remodel** for frontend **API calls** using **React Redux**, **lowering traffic** by **10+ seconds** per network call
- Implemented **report functionality** in internal management app to deliver **corporate lifecycle metrics** for **100+ partners**

LCBO — Sep. 2022 – Dec. 2022
Software Engineer Intern — *Kitchener, ON*

- Designed **LED product tag** flash functionality using a specialized API for **4,000+ products** at the LCBO's **flagship store**
- Oversaw business **relations** with exterior **partner Danavision** to design the LCBO's LED **product tag technology**

Polaris Intelligence, Inc. — Jan. 2022 – Apr. 2022
Software Engineer Intern — *Toronto, ON*

- Developed the Polaris **Trend Analysis module** using **React/Plotly** to delineate historical **Canadian census data**
- Attracted a **Big Five Canadian bank** by pioneering the Trend Analysis module, leading to a **potential partnership**

Projects

FeetBack | *React Native/Expo, C++, Express, Node, PostgreSQL, i18n*

- Built a **React Native BLE** client with **Expo** to parse and validate live sensor frames, driving **10 Hz foot pressure heatmap**
- Architected a **PostgreSQL ingestion** pipeline with **JWT session authentication**, achieving **>95% end-to-end data delivery**
- Designed a **BCNF schema** supporting **2 KB/day/user** and **7,000,000+ users'** weekly data within a self-hosted deployment

FoodFind | *JavaScript, HTML/CSS, MongoDB, Express, React, Node*

- Developed a **MERN Stack** app to display **proximal restaurants** and grocery stores to a user's location
- Produced core functionality for **location-based API** fetching, using the **Mapbox API** and custom styling
