EDUCATION

University of Waterloo

Bachelor of Applied Science – Computer Engineering, Co-op (Honours)

Sep. 2021 – Apr. 2026

Waterloo, ON

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Ruby, Java, C, C++, GraphQL, SQL, HTML, CSS, Verilog, Kotlin, MATLAB, PHP

Frameworks/Libraries: React, Redux, Rails, Next, React Native, Expo, Node, Vue, Spring Boot, Playwright, Cypress, Express

Tools: Git, Jira, Datadog, Vercel, Figma, Sentry, Grafana, Docker, Jenkins, CircleCI, Buildkite, Sonarqube, Vivado, Firebase

EXPERIENCE

StackAdapt

Software Engineer

Sep. 2025 – Present

Toronto, ON

- Built **multiple frequency** feature for 5 ad types with GQL/Redux, enabling granular pacing across \$10M+ in media spend
- Developed AI agent analyzing 3 teams' on-call histories to generate handoff metrics, replacing 100 employee-hours/year
- Restored 100% Buildkite validation by standardizing Playwright locator component patterns, stabilizing 30+ e2e tests
- Updated geo-targeting data using a 30,000-record rake ingest and RSpec scripts to republish live ad campaigns
- Strengthened backend data integrity by improving native ad validation logic for 11,000,000+ production records
- Improved GQL error callbacks and nested-path handling across 80+ references to boost Sentry error observability
- Directed a StackHack team of 5 to deliver a global advertiser filter, unifying cross-platform logic across 4 repositories

theScore

Software Engineer Intern

Jan. 2025 – Apr. 2025

Toronto, ON

- Upgraded theScore.com web platform from React 16/Next 9 to React 19/Next 15, improving Lighthouse scores by >40%
- Restructured component library for 5 marketing applications by eliminating barrel files, reducing bundle size by 33%
- Built new ESPN Bet signup form with React/GQL, deployed for NFL Championship weekend with 25,000+ impressions
- Improved configs/scripts for CircleCI automation in 5 web applications, boosting Lighthouse scores from 67 to 100

PointClickCare

Software Engineer Intern

Jan. 2024 – Apr. 2024

Mississauga, ON

- Updated 6 Spring Boot microservices to support Post-Acute Care products with >60% skilled nursing market share
- Adapted backend request using Redox API to boost National Provider Identifier transmission success from 28% to 100%
- Wrote automated unit/integration test suites using Cypress to maintain a Sonarqube code coverage score >90%

Amdocs

Software Engineer Intern

May 2023 – Aug. 2023

Toronto, ON

- Developed 10+ React components using Material UI to fulfil mockups for telecommunications enterprise software
- Directed full remodel for frontend API calls using React Redux, lowering traffic by 10+ seconds per network call
- Implemented report functionality in internal management app to deliver corporate lifecycle metrics for 100+ partners

LCBO

Software Engineer Intern

Sep. 2022 – Dec. 2022

Kitchener, ON

- Designed LED product tag flash functionality using a specialized API for 4,000+ products at the LCBO's flagship store
- Oversaw business relations with exterior partner Danavision to design the LCBO's LED product tag technology

Polaris Intelligence

Software Engineer Intern

Jan. 2022 – Apr. 2022

Toronto, ON

- Developed the Polaris Trend Analysis module using React/Plotly to delineate historical Canadian census data
- Attracted a Big Five Canadian bank by pioneering the Trend Analysis module, leading to a potential partnership

PROJECTS

FeetBack | React Native/Expo, C++, Express, Node, PostgreSQL, i18next

- Built a React Native BLE client with Expo to parse and validate live sensor frames, driving 10 Hz foot pressure heatmap
- Architected a PostgreSQL ingestion pipeline with JWT session authentication, achieving >95% end-to-end data delivery
- Designed a BCNF schema supporting 2 KB/day/user and 64,000,000+ users' weekly data within a self-hosted deployment

FoodFind | JavaScript, HTML/CSS, MongoDB, Express, React, Node

- Developed a MERN Stack app to display proximal restaurants and grocery stores to a user's location
- Produced core functionality for location-based API fetching, using the Mapbox API and custom styling
